Title: Deamons

Author:

A black covered book with
a drawing of a fiery red
creature upon the cover

--*--

No purer manifestation of
primal evil exists than
the hideous daemon, a
denizen of the dark and
infernal planes brought to
these shores by the most
vile wizardries. Only the
greatest of heroes have
ever vanquished a daemon
in single combat, and even
a group of valiant
warriors must be puissant
indeed to survive an
encounter with such a
fiend.

Daemons are rapacious,
and find man-flesh as
good as any other meat.
They also have a great
love for gold, and will
hoard it when they can.
When not about their
business of bloody deeds
and diabolic mischief, they
prefer to sojourn in
caverns below the ground,
and are especially thick in
the deepest recesses of
the legendary dungeons. A
daemon's bones are
greatly prized as magical
talismans of rare potency.
